We are excited to announce the launch of our new project, app2d@te, which aims to improve the digital competencies of teachers and students in the EU post-pandemic.

The project is led by C.D. "Teresa Di Calcutta" in Italy, and our partner organizations: Blestyashta Akademiya in Bulgaria, Educademy Prague in the Czech Republic, Kapadokya Egitim ve Arastirma Dernegi in Turkey, Osnovna sola Brezice in Slovenia, and IEJVC in France, and Gargzdu Minijos progimnazija in Lithuania.

As the EU Commission's 'Skills Agenda for EU' states, the green and digital transitions, as well as demographic trends, are transforming how we live, work, and interact. The coronavirus pandemic has accelerated these transitions and brought new career challenges for many people in the EU. Our project aims to improve the relevance of skills in the EU, strengthen sustainable competitiveness, ensure social fairness, and build our resilience.

Six actions directly linked to our project

- A Pact for Skills
- Strengthening skills intelligence
- EU support for strategic national upskilling action
- Skills to support the green and digital transitions
- Increasing STEM graduates and fostering entrepreneurial and transversal skills
- Initiative on Individual Learning Accounts

We held our first online meeting on October 17th, 2022, and our second online meeting on December 1st, 2022.

The first TPM (Transnational Project Meeting) of the project "app2d@te" was held on January 20th and 21st, 2023 in France. The host of the meeting was IEJVC and all project partners participated in the meeting.

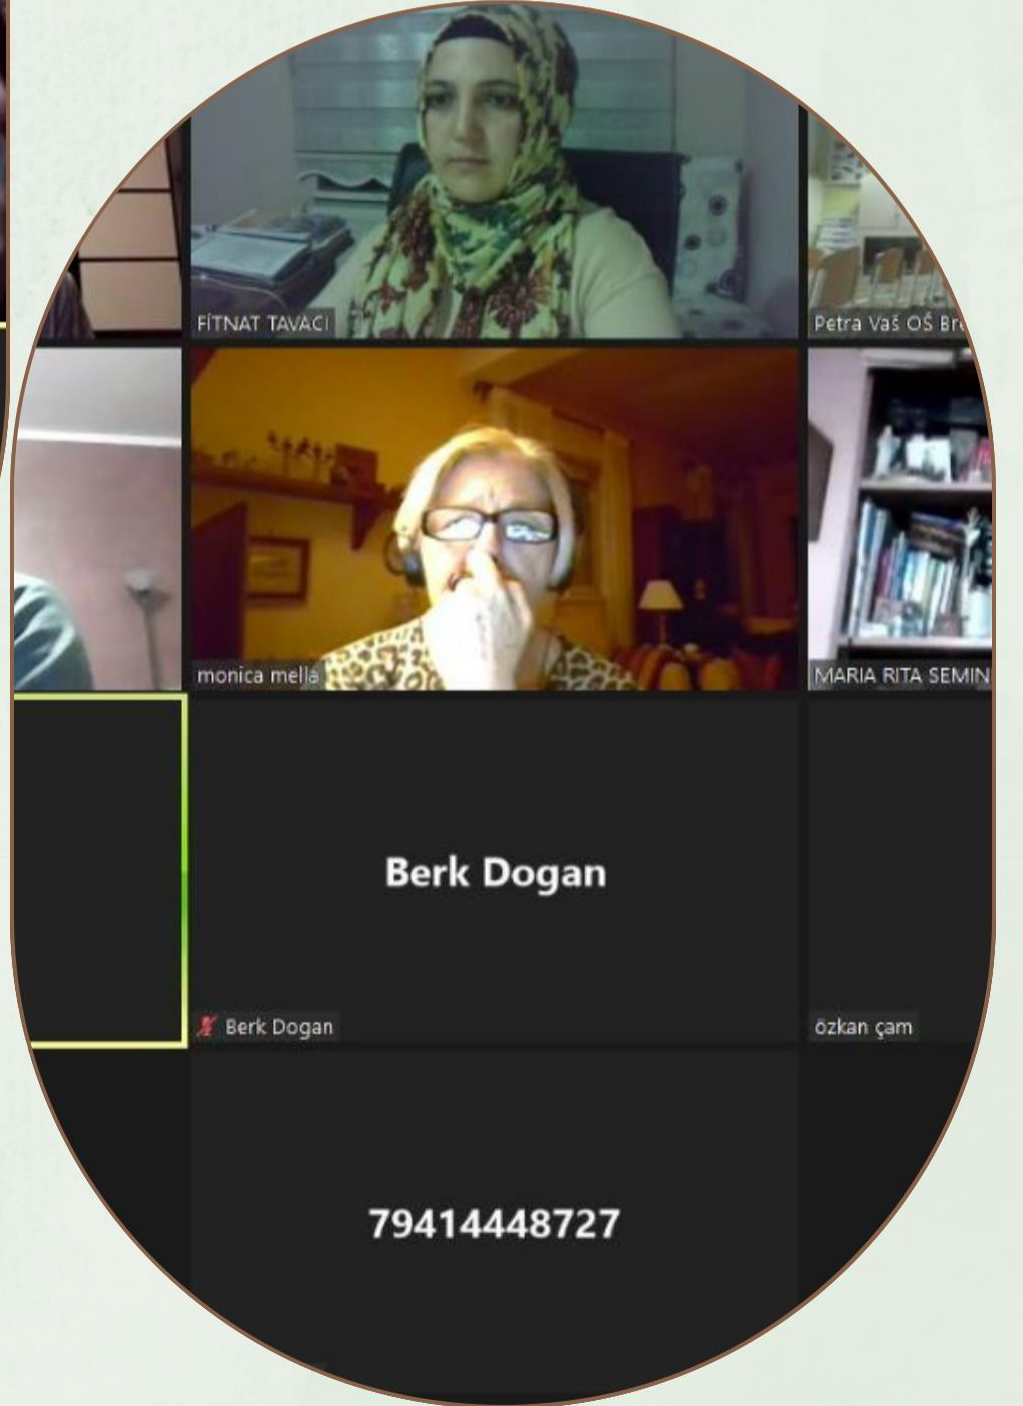

During the meeting, the partners had productive discussions on various important topics such as dissemination activities, budget management, and progress on the first intellectual output. Additionally, the partners discussed the plans for the upcoming activities and set out a clear work plan for the next stages of the project.

The partners took the opportunity to share their experiences and best practices with each other, which will be beneficial for the success of the project.

The next TPM is planned to be held in Brežice, Slovenia in August 2023, where the partners will review the progress made so far and plan for the next steps.

We look forward to updating you on the progress of the project in the coming months.
