Erasmus+ Project 2022-1-IT02-KA220-SCH-000088632 "app2d@te"

Co-funded by  
the European Union

The 3rd Physical TPM was held in Lithuania on the 30th and 31st of May 2024.

The host organisation, Gargždų "Minijos" progimnazija.

## WHAT HAVE WE DONE SO FAR

Each country had a representative at the meeting. First, the project Gantt chart was reviewed to check the progress of the project. The overall view of IO-2 was discussed, and partners uploaded their chapters and organised local pilot workshops. All partners were responsible for the dissemination and visibility of our project 'app2d@te' by sharing posts on social media and their organisation's website. The project's Gmail, YouTube and Facebook accounts were set up for further dissemination.

## FUTURE PLANS

Our upcoming focus in IO-3 Multilingual E-Learning Platform "DESK Curriculum," is to enhance self-esteem, digital skills, problem-solving abilities, and linguistic competences among teachers and students. Aims to adapt to digital transformation and employ the "No one left behind" strategy at the European level. We will develop a multilingual E-learning platform with contributions from all partners. Each partner will be responsible for teaching at least 2 hours on the final resource.

The project involves programming the E-learning platform, producing video lectures, managing external communication, and piloting the platform with English-speaking users. Key activities include opening dedicated sections, programming various functionalities, producing and reviewing video lectures, and creating communication scripts.

To ensure quality and effectiveness, we will analyze satisfaction and quality surveys and optimize the platform as needed. The Steering Committee will regularly review progress, and an external evaluator will provide independent assessments.
